

VENTILATION VERIFICATIONS IS YOUR BUILDING PROVIDING OCCUPANTS WITH ENOUGH FRESH AIRFLOW?

Mechanical Testing can provide you peace of mind by verifying your HVAC Systems:

- ✓ Verifications of **Air Changes** in specific spaces (Lecture Halls, Classrooms, Theaters, Nurses Suite)
- ✓ Measurements of the actual airflows being provided by HVAC Units
- ✓ Measurements of the supply and return airflows to specific spaces within your building.
- ✓ Measurement of **Room Pressures** (Clean, Dirty, Operating Room, Classroom, etc.)
 - Is the air flowing into and out of the space as designed?
- ✓ Verification of the HVAC Systems and their controls:
 - Integrity & Condition of the units, filters, etc.
 - Do the BAS controls work as intended?
- ✓ Recommendations based on findings:
 - Potential improvements to the systems & maintenance programs to extend the life of your HVAC Equipment.
